

## COVID-19-Related Death Announcement

**March 22, 2021** – It is with great sadness that the Marathon Family Health Team (MFHT) and the North or Superior Healthcare Group (NOSH) are reporting a COVID-19-related death in Marathon. The individual was a Chronic Care resident at the Wilson Memorial General Hospital. Out of respect in this difficult time, no further details will be provided.

The MFHT and NOSH offers our deepest condolences to the individual’s family and friends. “This is a very sad day for all of us at NOSH and especially for the loved ones of the individual who passed away. Our thoughts go out to everyone affected by this loss”, says Adam Brown, NOSH CEO. “Our hospital continues to take strong measures to protect our patients, our healthcare workers and our communities. Please continue to be safe and kind to each other as we get through this”.

We recognize that this news is difficult for all to hear. The loss of a community member is hard, especially under these circumstances. The MFHT and NOSH encourage our patients and community members to check-in, reach out and support one another, while following public health advice, as they live through this loss.

This unfortunately highlights the reality of COVID-19 and the need for everyone to take this virus seriously. Recognizing that many are at higher risk of serious illness or death from the virus, we urge everyone to continue doing everything they can to prevent its spread, including staying home as much as possible, limiting close contact with others, avoiding travel outside of our communities and following other safety measures.

We are in this together.
